OBJECTIVE

Passionate Front-End Developer with expertise in React.js and the MERN stack. Committed to building scalable, responsive, and user-centric web applications. Proven ability to integrate secure authentication and payment gateways in real-world projects.

SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, JWT, Firebase Auth

Tools: Git, GitHub, Firebase, Stripe, Postman, VS Code, Netlify, Vercel

Soft Skills: Communication, Teamwork, Adaptability

PROJECTS

InsightAI (Team Project) — Full-stack AI Content & News Platform. Live | GitHub

Overview: An AI-powered full-stack platform designed for content creators and journalists to automate high-quality article generation and manage global news updates through an intelligent, unified dashboard.

- Developed an AI-driven content hub for writers and bloggers, allowing them to generate high-quality articles using Gemini AI and edit them in real-time.
- Built a dynamic news discovery engine for users to track global trends via The Guardian API, featuring a fast debounced search system.
- Integrated Better Auth and Stripe to manage secure access and payments for premium subscribers.
- Collaborated on Better Auth and AI Content Generator architecture; managed content history (copy/download/save) and Profile Management with Roles & Permissions.

Tech Stack: Next.js, TypeScript, MongoDB, Better Auth, Stripe, Tailwind CSS, Shadcn UI.

WisdomCell – Digital Life Lesson Platform Live | Client | Server

Overview: A full-stack MERN platform for sharing life-changing insights, featuring a tiered content model, secure role-based access, and integrated monetization for premium resources.

- Engineered a robust system for users to draft, edit, and manage dynamic content with granular privacy controls (Public/Private) and monetization tiers (Free/Premium).
- Developed a sophisticated browsing experience using multi-layer filtering (categories, emotional tones), optimized search, and dynamic sorting for enhanced user engagement.
- Built Firebase Auth with Protected Routes and an Admin Dashboard for user analytics.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase Auth, Stripe, Tailwind CSS, Axios.

PlateShare – Community Food Sharing & Waste Reduction Platform Live | Client | Server

Overview:A full-stack MERN platform designed to minimize food waste by connecting surplus food donors with local receivers through real-time tracking.

- Implemented Firebase Authentication and Protected Routes for secure user access and actions.
- Built a dynamic Status Management System (Available → Requested → Donated) for food tracking.
- Developed a Location-Based Food Request Approval system to community contributions.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase Auth, Axios.

EDUCATION

Bachelor of Business Studies - National University
